

Recognized as the World Leader in Animal Chiropractic

AMERICAN VETERINARY CHIROPRACTIC ASSOCIATION

October 2021

RE: 2021 AVCA Annual Conference CE Information

The 2021 Annual Conference is November 12-14 and will be held at the Hyatt Regency Tamaya in Santa Ana Pueblo, New Mexico. The basic objective and goal of this conference is to provide attendees striving for excellence in animal chiropractic care and the improvement in health and welfare of their animal patients, with increased knowledge and competency in the new and current information on animal chiropractic philosophy, neuroscience, posture analysis, technique skills, and practice management.

AVCA Conference hours are accepted by:

Oklahoma State Board of Veterinary Medical Examiners
State of Nevada Board of Veterinary Medical Examiners

Enclosed please find:

1. Published Notice of Meeting
 - a. Please view on web site www.avca.regstep.com
 - b. Sampling of email/mailed notices enclosed
2. Published Conference Schedule with short synopsis per topic
3. Attendance Verification Form
4. Speaker Evaluation Form
5. Certificate of Attendance Form
6. Speaker List
7. Speaker Biographies (Additional information can be found at www.avca.regstep.com)

A doctor attending the conference can receive a maximum of 20 hours. Should there be any questions or requests, please contact me directly.

Thank you.

Sincerely,

Mrs. Leslie Means
Executive Director, AVCA

Leslie Means, AVCA <avcaoffice.means@gmail.com>

Double) \$144.00**

Resort fee waived

Chiropractic Professionals.**It's the Place to Be!**

We are looking for well-defined programs encompassing animal chiropractic. The presentations must be directed toward keeping the attendee apprised of advancements, new developments and review of information which is designed to build upon the basic curriculum required to practice animal chiropractic.

Do you have valuable knowledge that could help your peers?

- Leading-edge solutions or research that colleagues could use?
- Can you make AVCA certificants look like stars when they return to their practices with the knowledge you present?

If the answer to any of these questions is YES, we encourage you to SUBMIT a proposal to speak!

**CLICK FOR SPEAKER
SUBMISSION**

Pet friendly

Group room rate good from November 6-19 depending on availability.

Rooms have sold out 60 or more days in advance the last 5 years. Make reservations BEFORE October 25, 2021

There are a **limited number of suites** available, \$209. Please call the AVCA office directly to reserve a suite.

Conference Take-Aways: Knowledge, Perspective, Insight, Connection

Greetings to all of my Animal Chiropractic Colleagues!

The pandemic of 2020 has certainly been a first for the AVCA and our country. I know the pandemic has challenged us in ways we never imagined. As we emerge from the pandemic of 2020, many of us have reflected on what is important to us personally and professionally. It has helped us evaluate where we see our paths going in the future and given our country unity. This

past year gave us time to make adjustments in our personal and professional lives; perhaps by finding a new hobby or a new passion for our profession. For me personally, it was a time of creativity and working diligently to continue to practice while remaining safe and healthy.

I sincerely hope you include the [AVCA conference](#) in your plans for post-pandemic continuing education. This year we will meet in the [Hyatt Regency Tamaya Resort](#) near Albuquerque, New Mexico. The AVCA conference is a great opportunity to catch up with colleagues, long-distance friends, make new friends and make long lasting connections with people. Where else can you go and enjoy such a diverse group of people all with one common goal-serving animals? With the dynamic speaker line-up this year, you'll learn a new thing or two to take home with you! The diversity and uniqueness of our members is what makes the AVCA the leader in Animal Chiropractic.

I have been blessed with priceless friendships from the AVCA members, staff and directors. The hard work, generosity, sincerity and dedication to our profession is amazing. I am truly honored to be a member of the AVCA.

Dr. Kim Neff

Thank you for allowing me to serve on your board of directors and now the opportunity to serve as your president. The pandemic has taught me one thing for sure; there are no guarantees in life and we should embrace every opportunity we can because tomorrow is not promised. Enjoy your summer, stay healthy and I look forward to seeing and reconnecting with all of you in New Mexico this fall.

Blessings,
Kim Neff, DVM (Georgia)
Incoming President

Healthy Pets Game Changer Interview with Dr. Karen Becker, "Instant Traction on Slippery Floors Changes Dogs' Lives"

<https://healthy-pets.com/sites/healthy-pets/archive/2021/02/18/drop-instant-traction.aspx>

**James Israelson, DVM (Utah)**

Dr. James wrote that he has adjusted both of these teams (same owners) for several years, and they took first and second in the world championship cutter races held March 2021 in Utah. The teams race under the names JRP racing, and Jenson, Ropelato, & Padgett. He noted that it takes a special kind of crazy to be hanging on to the back of a tin can with 6 horses around you and 2 in front. He also wrote that his equine patients are complete chiropractic junkies.

The owners gave him permission to share this video with his colleagues.

Date	Start Time	Stop Time	Hours Requested	Session Title/Description Day 1 - List breaks, meals, etc.	Presenter Name	Session Topic	Clinical Cat 1	Scientific Cat 2	Prac-Mgmt Cat 3	Method of Delivery
November 12, 2021	8:00 AM	8:50 AM	1	Normal Neutral Posture- is there such a thing? What can we learn from an animal's default posture? Posture and locomotion are two sides of the same coin; without correct posture, there can be no correct movement. We will explore the difference between common standing postures observed in horses and dogs, and normal neutral postures (NNP) that facilitate healing and integrated performance, and learn why domestic animals are so prone to displaying Abnormal Compensatory Posture (ACP).	Karen Gellman, DVM, PhD Judith Shoemaker, DVM	anatomy, physiology, physics, neurology, animal handling, Other: Posture	20	25	5	Lecture
November 12, 2021	9:00 AM	9:50 AM	1	Connecting Between Nervous Systems-teaching neutral posture to patients by mideling it ourselves. How can we help our patients have a coherent relationship with gravity, if we don't have one? We can reach other humans verbally, but words are meaningless to gain an animal's trust and understanding. The body distortions and autonomic tone dyasias that accompany Abnormal Compensatory Posture commonly make animals confused, difficult to train and lacking in confidence. We connect by showing that we have what they want— a clear and coherent nervous system. This promotes a cooperative learning situation rather than an experience of things being "done" to them. In this session, we will explore the way nervous systems connect in social animals, and how proprioceptive distortions lie to us. We will engage in postural control explorations that help us to understand how our own bodies are responding to gravity, so we can interact with our patients with empathy and coherence.	Karen Gellman, DVM, PhD Judith Shoemaker, DVM	anatomy, physiology, physics, neurology, animal handling, Other: posture	25	15	10	Lecture
November 12, 2021	9:50 AM	10:20 AM	N/A	Break	N/A	N/A	N/A	N/A	N/A	N/A
November 12, 2021	10:20 AM	11:10 AM	1	Canine Rehabilitation: What is it and Why Would I Add it To My Chiropractic Practice. Rehabilitation is the fastest growing field in veterinary medicine and it blends so well with Chiropractic Therapy. It is not just an underwater treadmill and trained professionals should be guiding it. Learn more about the different aspects of Rehabilitation, what cases can benefit, and how you can integrate it into the practice you already have.	Laurie McCauley, DVM	neurology, diagnosis, practice management, Other-rehabilitation	15	10	25	Lecture
November 12, 2021	10:20 AM	11:20 AM	1	Postural Integration 1. In this hands on workshop, participants will explore, through their own embodied experience, the concepts introduced in the lectures by Karen Gellman and Judith Shoemaker. Alexander Teacher, Elizabeth Reese, will guide students through a series of psycho-physical explorations to gain insight into the concepts of postural control and empathic touch.	Elizabeth Reese, AmsAT, M.Ed, LMHC	anatomy, neurology, Other-kinesthetic re-education	25	10	15	Workshop
November 12, 2021	10:20 AM	11:10 PM	1	Equine Mobility a Multimodal Approach. From Palpation through facial evaluation and neurosensory modulation this course will provide an overview of a multimodal approach to improving equine mobility	Wendy Coren, DC	physiology, chiropractic technique, practice management, Other-kinesiology facial tool and taping	30	15	5	Lecture
November 12, 2021	11:20 AM	12:10 PM	1	Equine Mobility a Multimodal Approach. From Palpation through facial evaluation and neurosensory modulation this course will provide an overview of a multimodal approach to improving equine mobility	Wendy Coren, DC	physiology, chiropractic technique, practice management, Other-kinesiology facial tool and taping	30	15	5	Lecture
November 12, 2021	11:20 AM	12:10 PM	1	Chiropractic Treatment of Hydrocephalus in Brachycephalic Breeds. Brachycephalic breeds of dogs commonly are born or later develop hydrocephaly. This abnormality is often considered an complicated, untreatable, poor prognosis and these animals are frequently euthanized at a young age. The science behind this chiropractic protocol for treatment in dogs presenting with hydrocephaly may be useful in the non-invasive treatment in humans, particularly infants and traumatic brain injury cases. Attendees will leave with the ability to diagnose and treat these cases in dogs.	Amy Hayek, DVM	anatomy, physiology, diagnosis, symptomatology, chiropractic analysis, xray, chiropractic technique	20	20	10	Lecture
November 12, 2021	12:10 PM	1:40 PM	N/A	Lunch Break	N/A	N/A	N/A	N/A	N/A	N/A
November 12, 2021	1:40 PM	2:10 PM	N/A	Annual Meeting	N/A	N/A	N/A	N/A	N/A	N/A
November 12, 2021	2:20 PM	3:10 PM	1	Harnesses - How a poor fit alters posture and mobility. Harnesses come on all shapes and sizes, just as do dogs. But many owners, pet shops, and yes, even doctors do not notice a poor fitting harness and the implications it has on that dog's posture, joint alignment, muscle and fascia, and mobility while wearing it. Over the miles of walking or jogging, an ill-fit harness can cause thoracic girdle rotation, abduction and rotation of extremities, upper thoracic impingement, and other signaling that leads to mal-alignment and future joint ailment. The presentation will show dogs on the street and market packaging of poor and good fitting examples. It will connect to potential chiropractic problems of recurrent subluxations and myofascial considerations.	Ava Frick, DVM	anatomy, neurology, symptomatology, chiropractic analysis	25	15	10	Lecture

Date	Start Time	Stop Time	Hours Requested	Session Title/Description	Presenter Name	Session Title	Clinical Cat 1	Scientific Cat 2	Prac-Mgmt Cat 3	Method of Delivery
November 12, 2021	2:20 PM	3:10 PM	1	Adjusting Show Steers the Sequel. This will be a second module for showing how chiropractic can	Mindy Neal, DC	anatomy, neurology,	35	10	5	Lecture
November 12, 2021	3:10 PM	3:40 PM	N/A	Break	N/A	N/A	N/A	N/A	N/A	N/A
November 12, 2021	3:40 PM	4:30 PM	1	Leg length as an indicator of spinal health. Leg length has long been used as an indicator of spinal health in the human patient. It has been mentioned in chiropractic lectures as a way to check for the presence of subluxations. This talk looks at the science of how and why leg length work in the quadruped.	Bill Ormston, DVM	anatomy, physiology, pathology, physics, neurology, symptomatology, chiropractic analysis	30	5	15	Lecture
November 12, 2021	3:40 PM	4:30 PM	1	Equine Hoof Imbalances and Their Whole-Body Consequences. When the equine hoof is trimmed or shod with an incomplete and/or incorrect understanding of proper hoof balance, the resultant hoof landings have a negative impact on not only the quality of movement, but on the short- and long-term health and well-being of the entire animal. This lecture describes the characteristics of, and rationale behind, the properly-balanced hoof, as well as the types and consequences of imbalances, to better equip the animal chiropractic professional to identify hoof care-related problems as they affect the overall comfort and performance of the horse.	Steven Hebrock, BS	anatomy, physiology, pathology, physics, diagnosis, symptomatology	40	5	5	Lecture
November 12, 2021	4:40 PM	5:30 PM	1	Equine Hoof Imbalances and Their Whole-Body Consequences. November 12, 2021	4:40 PM	5:30 PM	1	Following the Forces - What Musculoskeletal Ultrasound Teaches About Tissue Biomechanics and Injury in the Dog. This presentation will review how the new and growing technique of high resolution musculoskeletal ultrasonography in the dog can show previously unrecognized soft tissue structural relationships important to integrated function and injury causation. These will be reviewed in the context of common primary and secondary injuries that are often presented for chiropractic treatment.	Kimberly Henneman, DVM	anatomy, pathology, physics, diagnosis, chiropractic analysis, Other-Ultrasound	25	15	10	Lecture
(Using 50/60 Minute Hour)			13	Total Hours		Minutes	360	165	125

				Day 2 - List breaks, meals, etc.						
November 13, 2021	8:00 AM	8:50 AM	1	Functional Neurology of Motion - How an understanding of the neurology of motion will improve your skills as an animal chiropractor and provide a more comprehensive approach to treatment of your animal patients. Attendees will discover the basic principles of functional neurology as they are relevant to mobility and chiropractic. They will learn a systematic and neurologic approach to the evaluation of animals presenting with weakness, gait disturbances and pain syndromes, and topics to be discussed include a discussion of receptors and classifications. How movement patterns and immobility directly affect the neurology of the animal patient as it relates to chiropractic.	Patricia Holl, DC	anatomy, physiology, neurology, VSC	20	20	10	Lecture
November 13, 2021	9:00 AM	9:50 AM	1	Functional Neurology of Motion - How an understanding of the neurology of motion will improve your skills as an animal chiropractor and provide a more comprehensive approach to treatment of your animal patients. Attendees will discover the basic principles of functional neurology as they are relevant to mobility and chiropractic. They will learn a systematic and neurologic approach to the evaluation of animals presenting with weakness, gait disturbances and pain syndromes, and topics to be discussed include a discussion of receptors and classifications. How movement patterns and immobility directly affect the neurology of the animal patient as it relates to chiropractic.	Patricia Holl, DC	anatomy, physiology, neurology, VSC	20	20	10	Lecture
November 13, 2021	8:00 AM	8:50 AM	1	A multimodal Approach to Equine Mobility Lab. Hands on learning from palpation thought facial tools and ending with kinesiology taping. Participants will be able to add new tools to their tool box immediately.	Wendy Coren, DC	physiology	50			Lab
November 13, 2021	8:00 AM	8:50 AM	1	A Properly-Balanced Equine Hoof Trimming Practicum. Watching a proper horse hoof trim is an experience not many people have had, simply because the overwhelming majority of professional hoof care providers in the U.S. have not been educated on the importance of proper hoof balance, and the unintended but very real negative consequences of imbalance. This lab will demonstrate how a horse's hooves should be trimmed to facilitate the horse's long-term comfort and soundness while realizing the best movement possible, with an emphasis on identifying the properly-balanced hoof.	Steve Hebrock, BS	anatomy, physiology, pathology, physics, diagnosis, symptomatology, animal handling	50			Lab
November 13, 2021	8:00 AM	8:50 AM	1	Adjusting Show Steers the Sequel. This will be a second module for showing how chiropractic can improve the performance of the show animal and the benefits of starting early with these animals to maximize the effect of the adjustments. There is a ton of video and visual aids to help put it all together and help talk to your clients about why adjustments are so important at an early age and development.	Mindy Neal, DC	anatomy, neurology, diagnosis, symptomatology, animal handling, chiropractic analysis, chiropractic technique, marketing	50			Lab
November 13, 2021	9:50 AM	10:20 AM	N/A	Break Spinal Biomechanics when you don't have a spinal "column". Since gravity is the greatest force all bodies experience, it defines the structure and function of the neuro-musculo-skeletal system. Quadrupedal spinal support is fundamentally different than that of humans— like 90 degrees different. The horizontal spine was the original model since we emerged from the oceans hundreds of millions of years ago. It is a complex system: the interaction of countless small parts, in which the whole is greater than their sum; change may be effected through points of maximum influence, and it is both adaptive and evolutionary. We will explore the patterns of spinal contour in normal neutral posture and abnormal compensatory posture and their connections to spinal stability and emotional regulation.	N/A	N/A	N/A	N/A	N/A	N/A
November 13, 2021	10:20 AM	11:10 AM	1	Neuromuscular organization—the next level. All muscles are not created equal!! If the same subluxations keep returning in patients, there may be a persistent disconnect between structure, function and control. What does the macro and micro architecture of muscle tell us about its role in the body? Learn how horses, dogs and humans have identical problems to solve, and how building strength is not always the answer, especially for postural muscles, whose job is to stabilize.	Karen Gellman DVM, PhD Judith Shoemaker, DVM	anatomy, physics, neurology, animal handling, Other-posture	20	25	5	Lecture
November 13, 2021	12:10 PM	1:40 PM	N/A	Lunch Break	N/A	N/A	N/A	N/A	N/A	N/A
November 13, 2021	1:40 PM	2:30 PM	1	Limb Joint Mobilizations, Maitland Grade 1-4. A true chiropractic "thrust" would be considered a Maitland Grade 5 joint mobilization, but what effects can be seen with Maitland Grade 1-4 and how and when are they done. This lecture and lab will teach you about joint mobilization to help with hypermobile painful joints as well as hypo-mobile restricted joints. Add a tool to your toolbox that will be practiced with dogs and humans and can be used as soon as you get home.	Laurie McCauley, DVM	anatomy, physiology, physics, diagnosis, symptomatology, chiropractic technique	40	5	5	Lecture

Date	Start Time	Stop Time	Hours Requested	Session Title/Description	Presenter Name	Session Title	Clinical Cat 1	Scientific Cat 2	Prac-Mgmt Cat 3	Method of Delivery
November 13, 2021	1:40 PM	2:30 PM	1	Everything is connected. How viscerosomatic reflexes influence fascia, movement and conformation and how we can recognize them. Understand how the sympathetic and parasympathetic system develop, how viscerosomatic reflexes influence posture and movement and how we can recognize them and their compensation patterns from the outside. Easy 3-step-test to recognize them and a few clinical cases to understand the presentation better.	Martina Neidhart, DVM	anatomy, physiology, biochemistry, pathology, neurology, symptomatology, chiropractic analysis, Other-infrared evaluation	20	20	10	Lecture
November 13, 2021	2:40 PM	3:30 PM	1	Everything is connected. How viscerosomatic reflexes influence fascia, movement and conformation and how we can recognize them. Understand how the sympathetic and parasympathetic system develop, how viscerosomatic reflexes influence posture and movement and how we can recognize them and their compensation patterns from the outside. Easy 3-step-test to recognize them and a few clinical cases to understand the presentation better.	Martina Neidhart, DVM	anatomy, physiology, biochemistry, pathology, neurology, symptomatology, chiropractic analysis, Other-infrared evaluation	20	20	10	Lecture
November 13, 2021	2:40 PM	3:30 PM	1	Canine Fascial Lines: Identify, Treat and Tape. Attendee will learn about the fascial lines of the canine and how they pertain to movement. The first part is learn about what is normal fascial tissue and movement so you will recognize improper movement, tension or laxity. There are four techniques for treating the fascial tissue based on the objective. After the proper treatment of the fascial tissue kinesiology tape can be used to create lasting effects. Sharing knowledge of the treatment and how it works with the client creates better follow through and the client can actually assist with home treatment based on the clinicians findings. An animal with tape becomes a topic of discussion that can lead to referrals.	David Lundquist, DC	chiropractic technique	35	10	5	Lecture
November 13, 2021	2:30 PM	3:30 PM	1	Postural Integration 2. This workshop will build on the concepts learned in in workshop 1. Students will explore simple, everyday movement, walking, lifting, pulling, pushing, sitting, standing and connecting to each other, while attending to their primary coordination. If you have studied the Alexander Technique previously, you can take this section without taking section 1.	Elizabeth Reese, AmsAT, MEd, LMHC	anatomy, neurology, Other-kinesthetic re-education	24	12	24	Workshop
November 13, 2021	3:30 PM	4:00 PM	N/A	Break	N/A	N/A	N/A	N/A	N/A	N/A
November 13, 2021	4:00 PM	4:50 PM	1	Using Social Media to Build Your Practice. Social media can reach a large network of potential clients. We will discuss the use of a number of social media platforms and how best to get results. Facebook, Instagram, Tiktok and podcasts can all be viable networks. Consistency of message and persistence posting is key to building a base following. Learn how to separate your posts from so many others to be noticed.	David Lundquist, DC	marketing	5	10	35	Lecture
November 13, 2021	4:00 PM	4:50 PM	1	The Quantum of Fascia. Attendees will understand what role fascia plays in total body structure and physiology. Attendees will learn about the microstructure of fascia and how that affects function. Attendees will understand the role that fascia plays in total body movement, tissue communication and immune function. Attendees will have a better understanding of how chiropractic correction of pathology affects total body fascial function	Kimberly Henneman, DVM	anatomy, physiology, physics	10	35	5	Lecture
November 13, 2021	5:00 PM	5:50 PM	1	Growth and Quality Enhancement in Broiler Chickens. The objective of this paper is to find the effects of chiropractic adjustments on Black Broiler chickens during rearing. The cost of chicken feed is a significant portion of the expense of raising meat chickens. Raising pastured chickens becomes expensive due to the effects of predation. This study sought to explore the potential benefits of the chiropractic adjustment on the economics of raising pastured Black Broiler chickens for meat.	Amy Hayek, DVM	physiology, neurology, animal handling, practice management	10	35	5	Lecture
November 13, 2021	5:00 PM	5:50 PM	1	How to Integrate Chiropractic into a Rehabilitation (Physiotherapy) Program in Dogs and Horses (and Sometimes Cats). Often when rehabilitation or physiotherapy is recommended after an injury, rarely do surgeons, veterinary practitioners or rehab therapists think of adding chiropractic. While acupuncture and manual therapies (massage) are recognized adjuncts, chiropractic is ignored due to misunderstanding or ignorance of the benefits that its techniques can provide for hastening recovery. This presentation will look at how chiropractic can be properly integrated into a rehabilitation protocol, and how to present it to those unfamiliar with the modality.	Kimberly Henneman, DVM	chiropractic analysis, chiropractic technique, practice management, Other-rehabilitation	20	10	20	Lecture

November 14, 2021	8:00 AM	8:50 AM	1	The Art of Palpation - How to Listen to What Your Hands Tell You. This lab will concentrate on the dying art of assessment of a body's tissues through touch and palpation. We will first cover how the sense of touch works for the evaluator, including exercises to develop and improve greater sensitivity in our finger and hand sensors. Then we will learn how to not only use our fingers properly when assessing an animal, but also how to understand the subtleties about tissue health and pathology that the sense of touch can discover. [We'll assume that what is learned for dogs is applicable to cats within reason.]	Kimberly Henneman, DVM	anatomy, neurology, diagnosis, animal handling, chiropractic analysis	50			Lab
November 14, 2021	8:00 AM	8:50 AM	1	Canine Fascial Lines: Identify, Treat and Tape. Attendee will learn about the fascial lines of the canine and how they pertain to movement. The first part is to learn about what is normal fascial tissue and movement so you will recognize improper movement, tension or laxity. There are four techniques for treating the fascial tissue based on the objective. After the proper treatment of the fascial tissue kinesiology tape can be used to create lasting effects. Sharing knowledge of the treatment and how it works with the client creates better follow through and the client can actually assist with home treatment based on the clinicians findings. AVCA Annual Conference 2021

ACCC/AVCA Program No. 2117
Location: Hyatt Regency Tamaya Resort and Spa, 1300 Tuyuna Trail, Santa Ana Pueblo, NM 87004
Dates: November 12-14, 2021
Friday: 7:50 am – 5:30 pm
Saturday: 8:00 am – 5:50 pm
Sunday: 8:00 am – 2:10 pm

1. Please mark the lecture/s you attended and the number of hours you were there.
2. **This voucher must be signed by the AVCA Secretary and turned in at the AVCA Information table BEFORE you leave the conference.**
3. The hours will be totaled by the office and a Letter of Attendance will be mailed to you. (Maximum total per full conference is 20 hours.)

LECTURE TITLE- LECTURER – CREDIT HOURS	ATTENDED HOURS	LECTURE TITLE - LECTURER- CREDIT HOURS	ATTENDED HOURS
FRIDAY, NOVEMBER 12, 2021 - Maximum Hours Per Attendee is 7			
Normal Neutral Posture – is there such a thing? – Gellman/Shoemaker - 1		Connecting Between Nervous Systems – Gellman/Shoemaker – 1	
Canine Rehabilitation – McCauley – 1		Equine Mobility a Multimodal Approach – Coren – 2	
Chiropractic Treatment of Hydrocephalus in Brachycephalic Breeds – Hayek – 1		Adjusting Show Steers – Neal - 1	
Harnesses – How a poor fit alters posture and mobility - Frick - 1		Equine Hoof Imbalances and Their Whole-Body Consequences – Hebrock - 2	
Leg length as an indicator of spinal health – Ormston - 1			
Following the Forces – Henneman - 1		Practical Posture 1 Workshop – Reese – 1 (Must be pre-reg)	
MAXIMUM HOURS FOR FRIDAY IS 7 SUB-TOTAL		SUB-TOTAL	
SATURDAY, November 13, 2021 - Maximum Hours Per Attendee is 8			
Functional Neurology – Holl - 2		Practical Posture 2 Workshop – Reese – 1 (Must be pre-reg)	
Spinal Biomechanics when you don't have a spinal "column" – Gellman/Shoemaker - 1		Everything is Connected – Neidhart - 2	
Neuromuscular organization – the next level – Gellman/Shoemaker – 1		The Quantum of Fascia – Henneman - 1	
Limb Joint Mobilizations, Maitland Grade 1-4 – McCauley - 1		How to Integrate Chiropractic into a Rehabilitation Program – Henneman - 1	
Canine Fascial Lines: Identify, Treat and Tape – Lundquist - 1		LAB Coren: Equine Mobility a Multimodal Approach - 1	
Using Social Media to Build Your Practice – Lundquist - 1		LAB Hebrock: A Properly Balanced Equine Hoof Trimming - 1	
Growth and Quality Enhancement in Broiler Chickens – Hayek - 1		LAB Neal: Adjusting Cattle - 1

American Veterinary Chiropractic Association

442236 E 140 Rd ~Bluejacket ~ OK ~ 74333

Approved by:

American Veterinary Chiropractic Association - Program # 2117

Oklahoma State Board of Veterinary Medical Examiners

Authorized <INSERT DATE> by:

Mrs. Leslie Means, Executive Director

This program (AVCA #2117) is approved by the AVCA Education Committee to offer a total of 42 CE Credits, with a maximum of 20 CE Credits being available to any individual. This AVCA approval is for the subject matter categories of: Scientific, Clinical and Practice Management using the delivery method of Lecture and Lab. This approval is valid for AVCA/ACCC re-certification and in jurisdictions which recognize AVCA CE; however, participants are responsible for ascertaining each board's CE requirements.

Dr. _____, a chiropractor /
veterinarian (pick what applies), practicing in
_____ (name of town, etc.) recently
attended the 2021 American Veterinary Chiropractic Association (AVCA) Annual Conference
and General Membership Meeting held at Santa Ana Pueblo, New Mexico. The annual
conference offers advanced learning for doctors certified in animal chiropractic by the Animal
Chiropractic Certification Commission (ACCC) of the American Veterinary Chiropractic
Association (AVCA).

Licensed doctors of chiropractic and licensed doctors of veterinary medicine who have
passed a postgraduate program in animal chiropractic approved by the AVCA are eligible to sit
for the ACCC/AVCA Certification Examinations. In order to become ACCC/AVCA certified in
animal chiropractic a graduate from one of the approved programs must pass both the ACCC
Comprehensive Written and Clinical Competency Examination. An ACCC/AVCA Certified
Doctor is required 30 hours of continuing education every three years to keep certification
current.

The AVCA was established in 1989. Chiropractic is a drug-free approach to pet health
care. It deals with the nervous system housed inside the spinal column. If you are seeking health
care treatment for neuromusculoskeletal function or dysfunction in your animal, or would like
more information on animal chiropractic, call Dr. _____
at: _____ or visit the AVCA web site at www.animalchiropractic.org.

Speaker's Name	Dr. Karen Gellman
Address	207 Columbia St, Ithaca, NY 14850-5733
Phone Number	607-227-5406
Credentials (Degree/s)	DVM, PhD
Biography Detail	<p>Karen Gellman DVM, PhD is a graduate of Cornell College of Veterinary Medicine, and has a doctorate from Cornell in animal locomotion biomechanics. She has advanced training and certification in veterinary acupuncture and veterinary chiropractic and has practiced these and other holistic modalities since 1995. She leads pre-college programs on research at Cornell and teaches internationally about posture, locomotion biomechanics, equine dentistry and veterinary complementary therapies to veterinary professionals and allied professions. In 2019, Dr. Gellman founded Plena Curae Botanical Solutions, a company making novel botanical pain solutions for pets and horses. Judith M. Shoemaker, DVM, is an internationally known practitioner and educator in complementary veterinary medicine and therapy. Drs. Gellman and Shoemaker are co-founders and principle instructors, along with Elizabeth Reese CTAT, for Postural Rehabilitation for Horses and Dogs, a professional CE program, which provided approved AVCA CE from 2005-2014. They were awarded an AHVMF research grant in 2013 to study posture in horses, and are in the process of publishing those results in peer-reviewed scientific journals.</p>

Speaker Biography:

Lecture Topic/Title 1. Equine Hoof Imbalances and Their Whole-Body Consequences

2. Lab: A Properly-Balanced Equine Hoof Trimming Practicum

Speaker's Name Steven Hebrock

Address 642 Shook Road, Akron, OH 44319

Phone Number (330) 813-5434

Credentials (Degree/s) M.S. in Engineering, B.A. in Music Theory/Composition

Biography Detail Steve Hebrock, a Certified Master Hoof Care Professional, began his hoof care odyssey in 1993 after acquiring his first horse. He soon became frustrated by what he perceived to be illogical ideas and practices that dominate traditional hoof care, and his engineering background prompted him to begin an intense study of trimming, shoeing, and movement theory. Mr. Hebrock spent many years as a member of the faculty at The Ohio State University Agricultural Technical Institute in Wooster, Ohio, where he taught hoof care and farriery; equine marketing and facilities management; and a number of engineering and technical classes. Mr. Hebrock now focuses his time and energy on his hoof care practice, ongoing hoof research, and his educational outreach efforts via "Enlightened Equine," a blog dedicated to bringing science to horse management and hoof care. Mr. Hebrock holds a Master of Science in Engineering from the University of Wisconsin (2015), and is a certified hoof care professional and booting specialist in the Association for the Advancement of Horse Care Practices (AANHCP) and in Liberated Horsemanship. He is a former certification exam instructor, workshop leader, and field instructor for the AANHCP, and is currently an advanced trimming instructor and field instructor for Liberated Horsemanship, which regularly conducts hoof trimming training clinics both domestically and internationally for students from all over the world.

Speaker's Name	Dr. Kimberly Henneman
Address	3070 Rasmussen Rd. Suite 80, Park City, UT 84098
Phone Number	435-647-0807
Credentials (Degree/s)	DVM
Biography Detail	<p>Kim Henneman DVM, DACVSMR (EQ, K9), FAAVA, DABT, CVA, CVC received her DVM from Purdue University in 1986. She then became certified in veterinary acupuncture (IVAS) in 1991, veterinary chiropractic from the great Sharon Willoughby in 1992 (AVCA) & Traditional Chinese Veterinary Herbal Medicine in 2000 (IVAS). In 2008 she added advanced certification in acupuncture (FAAVA) & thermal imaging (DABT) - all while working in a conventional, 6-person veterinary practice. She started her own practice, Animal Health V.I.P.S. (Veterinary Integrative & Performance Specialists), in 1989 with the goal of creating a unique integrative approach to life-stage medicine, as well as sports medicine and rehabilitation in dogs, horses, cats, & the occasional bucking bull & zoo mega-vertebrate. In 2013, she applied to sit for one of the early Board tests in the new specialty college of Veterinary Sports Medicine & Rehabilitation. After passing the canine exam, she sat for and passed the equine exam in 2014, becoming the first (and so far, only) veterinarian to be Boarded in both species. In addition to running her very active practice - based in Utah, but licensed in 10 states, Dr. Kim has also accompanied the USET's Endurance team to many international competitions, has been the on-site, 14-year veterinarian for the third largest US International sheep herding competition, and just celebrated her 10th year as an Iditarod Trail veterinarian. Dr. Kim has also taught at numerous conferences (including AVCA) & veterinary schools, as well as contributed to several magazine articles and textbooks (integrative therapies, thermal imaging, sports medicine & rehabilitation). She is a national & international thermal imaging consultant for zoos and in working animals. In her time off, Dr. Kim travels, fine-tunes her wildlife, landscape, aviation and night photography, and training to get back to 3-Day Eventing with her new mare, Feather.</p>

Lecture Topic/Title Porcine Adjusting – Improving the lives of Show, Pet and Feeder Pigs

Speaker's Name Dr. Emily McLeod

Address 3701 Ford Ave, Kansas City, KS 66102

Phone Number 816-694-9003

Credentials (Degree/s) BS, DC, CAC, MTAA

Biography Detail Animals have always been part of Dr. McLeod's life. She's rescued too many strays to count, has always cared for furry friends, and has a heart to help those who can't always help themselves. A graduate of Cleveland Chiropractic College in 2000, Dr. McLeod earned both the Clinic Service and Clinic Excellence awards while completing her clinicals. She opened a family wellness center in 2001 and joyfully served hundreds of people each week with chiropractic care. In 2004 Dr. McLeod returned to school to earn her National Certification in Equine and Small Animal Chiropractic Care through the American Veterinary Chiropractic Association.

In June of 2013, Dr. McLeod left her 2-legged practice to pursue a full time animal practice. She can be found working on small animals at GreenSummit Animal Clinic in Lee's Summit, MO at Excelsior Springs Animal Clinic in Excelsior Springs, MO and at Mission Road Animal Clinic in Prairie Village, KS. She sees large animals at Strain Equine Services in Bonner Springs, KS and Holt Animal Clinic in Holt, MO. Dr. McLeod is licensed in both Kansas and Missouri. She's had the privilege of speaking for many organizations, including the Kansas City Veterinary Medical Association and she is the assistant director of the Animal Chiropractic Program at Parker University in Dallas, TX. Dr. McLeod has a passion for helping others in the field of animal chiropractic enjoy busy, healthy, successful careers and has mentored several veterinarians and chiropractors over the last 17 years. She lives with mastiffs, house pigs, cats, a fish and her very best friend, her husband.

Speaker's Name	Dr. Martina Neidhart
Address	Moosbrunnenweg 48, Lüterswil, 4584 Switzerland
Phone Number	+41-793-725835
Credentials (Degree/s)	DVM
Biography Detail	Martina Neidhart DVM, DVC, CVA, TVCT, EKPT, CERT, APf-1 Graduating from the university of Bern (Switzerland) and Budapest (Hungary) Dr Neidhart worked first in several clinics on Small animals and Equines. Where she already started to work with rehabilitation and alternative healing modalities. Since 2010 she has her own practice for rehabilitation, manual-and integrative therapy. She worked as instructor for veterinary chiropractic at the Backbone Academy from 2014-2017. She is traveling the world to learn more and share knowledge with colleagues. April 2018 she got a speaker award at the 1. European Congress for Integrative Veterinary medicine in El Escorial Spain. She has a keen interest in rehabilitation and is still working towards her board certification in Equine sports medicine and rehabilitation. She fell in love with podiatry, when searching for further modalities that could help her patients. With her Partner Dennis Verdon, she is giving lectures for vets and farriers about equine podiatry and its influence on the upper body all over the world.

Speaker's Name Elizabeth Reese

Address PO Box 463, Sugarloaf, NY 10981

Phone Number 917-647-5251

Credentials (Degree/s) AmSAT, M.Ed, LMHC

Biography Detail Elizabeth Reese is a certified Teacher of the Alexander Technique, a dressage rider and instructor, and mental health counselor, working with both humans and horses to explore the relationship of postural stability to emotional resilience. She was a founder and principle instructor for Postural Rehabilitation for Horses and Dogs, a professional CE training for veterinarians and chiropractors, giving AVCA approved CE. She currently is on faculty at Bard College Vocal Arts MFA program and Neighborhood Playhouse, a professional acting training program in NYC. She has been senior faculty at AT-NYC and gives workshops on AT and postural resilience for veterinarians, AT teachers and riders worldwide. Her work with both humans and horses suffering from trauma inspired her to study the relationship of postural stability to emotional resilience. She completed a master's degree in Mental Health Counseling at Hunter College during which time she worked at Mount Sinai Hospital's Day Treatment Program for people with chronic mental illness. For the following three years, she worked as a therapist in community mental health in New York City. She maintains a private practice in Sugar Loaf, New York and in NYC.
